

CANYON DEL ORO EARLY CHILDHOOD EDUCATION

CDO PRESCHOOL

Sharpening Minds Together!

Canyon del Oro ECE program has an onsite preschool lab attached to the high school classroom. Our Early Childhood Center is owned and operated by Amphitheater Public Schools and managed by our high school ECE teacher. Our preschool is staffed by a certified elementary school teacher with a masters degree in Early Childhood Development, a preschool assistant and a preschool aide. High school ECE students learn workplace and professional skills while in the preschool and classroom.

Level 1

Beginning students learn about how a child grows and develops from conception to school age. High school students interact and play with preschool students. Students also take care of RealCare babies®.

Level 2

Intermediate students dig deeper into how young children learn. High school students learn how to develop art lessons and teach those lessons in the preschool. Students in this class are responsible for the Preschool Art Show in April.

Level 3/4

Advanced Students develop and execute lessons in the preschool weekly. High school "Junior Teachers" not only teach, but become buddies to the preschool students.
