

This document will help you prepare your child to take the MAP Growth test at home. The results from MAP Growth testing will provide a more complete picture of what your child knows and is ready to learn—whether it is on, above, or below their grade level. Teachers use these results to tailor classroom lessons and set goals for students.

It is important that you read all of the enclosed information and complete the steps under “Test Preparation” on the next page. Thank you for helping us help your child!

What is MAP Growth?

 <p>MAP Growth helps teachers understand what students know today, so goals can be set to improve growth throughout the year. Students cannot pass or fail this test.</p>	 <p>This test will not affect grades. In fact, it's normal for students to only answer about half the questions correctly. Please don't help them!</p>	 <p>Given the challenges of learning from home, MAP Growth test results are especially helpful for us this year. These results will help us know what students are ready to learn.</p>
---	---	--

- **MAP Growth tests are unique because it adapts to your child's responses to measure your child's skill level.** If your child answers a question correctly, the next question is more challenging. If they answer incorrectly, the next one is easier.
- **Amphitheater Public Schools has used MAP Growth scores for nearly 20 years** to help teachers check student performance in Reading and Math. Each subject has between 40-53 questions and takes about 60-75 minutes to finish.

MAP Growth Test Preparation

Do these steps **before** Test Day

1. Make sure the device has an internet connection.
2. Follow the instructions in the attached *Device Readiness and Student Practice Exercise* document.
3. Download and install [Zoom](#) (free app) or bookmark <https://zoom.us/join> to join via browser.
4. Bookmark test.mapnwea.org. If you get an error, disable popup blocking on so the test window will load on test day (instructions are below).

Do these steps **on** Test Day

1. Minimize distractions for your child as much as possible.
2. Provide a quiet testing environment (headphones may be used).
3. Launch Zoom and join your child's Zoom meeting.
4. Keep your Zoom camera on so that your teacher can periodically check in with you, see how things are going, and troubleshoot (if necessary).
5. Log in to MAP Growth at test.mapnwea.org.
6. Follow any additional instructions given by your child's teacher (or test proctor).

How to Disable Pop-up Blocking for the Test *(so the test window will load)*

- **Chrome:** Click the **Menu** icon to the right of the address bar (it is the icon with three vertical dots). Select **Settings > Advanced > Privacy and Security > Site Settings > Pop-ups and redirects**. Either toggle the **Blocked** option, or add [\[*\].nwea.org](https://test.mapnwea.org) to the **Allow** list.
- **Firefox:**
 - **Windows:** Click the **Menu** icon to the right of the address bar (the icon with three parallel lines.) Select **Options**, then go to the **Privacy & Security** tab. Clear the **Block pop-up windows** checkbox, or click **Exceptions...** then add "https://test.mapnwea.org" to the list of allowed websites.
 - **Mac OS X:** From the menu, select **Firefox > Preferences > Content**. Clear the **Block pop-up windows** checkbox.
- **Internet Explorer:** Select the **Tools** button (it looks like a gear), then select **Internet options**. On the **Privacy** tab, under **Pop-up Blocker**, uncheck the "Turn on Pop-up Blocker" option. You can also click **Settings** to add [\[*\].nwea.org](https://test.mapnwea.org) to the **Allow** list.
- **Safari:**
 - **Safari 11:** From the Safari menu, select **Preferences**, then the **Security** tab. Clear the **Block Pop-up Windows** check box.
 - **Safari 12:** Right-click in the address bar and select **Settings For This Website**. Change the **Pop-up Windows** selection to **Allow**.
 - **iPad:** **Settings > Safari > Block Pop-ups**. If the slider is green, turn it off by swiping to the left.

How to Join a Zoom Meeting

You can run Zoom by the app or within a browser, but the easiest way is to download the app (from zoom.us/download). Once you launch the app, you can add the meeting information under "Join".

If using a browser, you can join a meeting by going to join.zoom.us and entering in the meeting ID (and passcode, if any).

Common Problems

Fix the Screen resolution error

- Chromebook: Ctrl+Shift+0, then refresh browser
- Windows: Ctrl+0, then refresh browser

“Oops! Where’s my test window?” error

- Please disable pop-up blocking

The screen goes white, or the “Please raise your hand...” message appears

- This is an internet connection problem; please wait 15 seconds before contacting your child’s teacher to see if it resolves itself

Session login information is not working

- Make sure your child is on “test.mapnwea.org” and not the practice test

The “Next” button is gray or unavailable

- Please verify that your child has selected an answer (students can’t skip questions since the test is adaptive)
- Push the F5 key to refresh the screen
- Reset test item by clicking “reset” in the bottom left-hand corner

The audio has stopped playing

- Push the F5 key to refresh the screen
- Verify headphones are plugged in (if they come unplugged during the test, you will need to ask your teacher to pause the test and plug them in)

Notify your child’s teacher immediately if these things occur:

- Your child’s name isn’t listed on the screen
- Your child is unable to connect or login to the test

How to Help Prepare Your Child for the MAP Test

- Remind your child that it’s okay if they don’t know all the answers. Some questions will be easy, and others will be more difficult. Your child should just try their best and select their best guess.
- Your child will not be graded on this test. Your child’s score will be used by their teacher to help identify what your child already knows and what they might be ready to learn.
- Ask your child to give this their best effort, and take their time. They can continue the test on another day if necessary; their progress will be saved.
- If your child is going too fast, their teacher will get a warning that your child may not be reading everything on the page before answering.
- Your child’s test is always changing and updating based on how your child answers each question. Each new question depends on how your child answered the one before it. This is why your child can’t go back to a previous question or skip a question.

Step 2: Device Readiness—Check Student Workstations

Either follow the directions in this exercise or click here: [Device Readiness Check](#)

1. Direct your child to open a browser and go to: check.nwea.org

After a few seconds, your child should see the banner at the top change from “Loading... Please wait” to either a green checkmark for pass or a red “X” for fail.

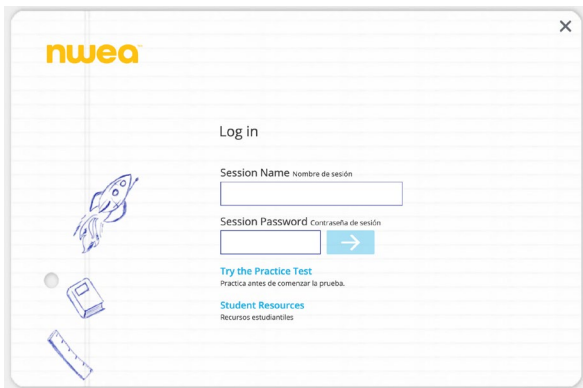

✓ This machine has passed the check. [TEST AGAIN](#)
 Devices that pass this check are much less likely to encounter issues that may disrupt testing. We recommend running this check on several workstations, in each testing lab, prior to your first day of testing.

✗ This machine has failed the check. [TEST AGAIN](#)
 ⚠ Please contact your Network Administrator. If you need additional help resolving these issues please contact NWEA Partner Support.

If your device does not pass, please contact your child's homeroom or testing teacher for next steps.

2. Once the device has passed, your child should go to: test.mapnwea.org

Your child should see the login page.

If your child only sees the “Oops! Where’s my test window?”, you will need to disable pop-up blockers on the device.

If your child sees the “Workstation Readiness Check” error, review the “System Component” column to determine the updates needed for the device.

Tip: For Chromebooks getting the screen resolution error: Ctrl+Shift+0, then refresh browser.

3. Once you see the login page, the device has met the minimum requirements for testing.

Step 3: Try a Practice Test

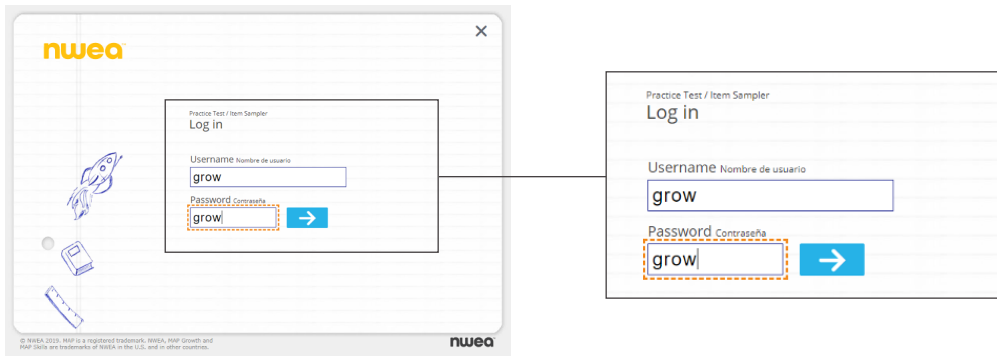

The practice test has only a few questions and will not be scored. It provides an opportunity for your child to become familiar with the test question format.

1. Ask your child to open a browser and go to: practice.mapnwea.org .

2. Type in:

Username: grow

Password: grow

3. Have your child select their grade, a subject, "English" as the test language, and the test type from the drop-down menus.

If your child needs Spanish directions during the test, select the “Mostrar instrucciones en español” checkbox in the top right corner. Unfortunately, students cannot take the **test** in Spanish.

4. Select the “Exit Test” button or close the application when your child is done.
