thinkSmart, Aviar Design,
Schneider Structural Engineers

Design team

Phil Swaim, Mark Bollard, Emanuel Torres

Client

Amphitheater Public Schools

Area

69,000 sq. ft.

Total cost

\$19,756,644

Capacity

500

Space per student

138 sq. ft.

Cost/square foot

\$286

Completion

July 2017

Photographer

Kyle Zirkus Photography

The Amphitheater School District had a strong desire to construct a school designed around a STEM-focused curriculum. Six buildings form a campus with an inner courtyard presentation area. Students are organized into three learning communities: young, middle and older. The young community learning labs are large enough to provide space for varied activities. The middle and older student communities have six learning labs and one project maker space.

Each learning lab provides multiple group or individual configurations. Outfitted with flexible furniture and built-in benches, the space may be reconfigured based on the lesson. The central breakout area provides activity kiosks that offer opportunities for individual and team learning. Each community has an outdoor lab with water harvesting and project areas.

The student commons building has music, art and tech labs, dining, scientist-of-the-day presentation area and library functions. Exterior materials were selected for performance, and colors that reflect the Sonoran Desert are used. The campus has a 150-kilowatt solar system. Solar canopies provide shade for the outdoor labs. ■

Amphitheater High:

Replaced HVAC on the 400 wing of the Commons Building ~ \$7,720

Canyon Del Oro:

Library condensing units & coils replacement awaiting materials ~ \$91,701

Replace controls ~ \$6,088

Exterior painting of south gym ~ \$74,648

Start date 12/17 completed by the end of winter break
